The Leviton Load Center

Take power to new heights with the award-winning Leviton Load Center – the most intelligent circuit breaker system. It's the smart solution that offers unparalleled management of your home's electrical system.

Approachable
- Modern design with intuitive functionality and appealing aesthetics
- LEDs communicate trip condition and type of fault (AF/GF) and remain illuminated even when tripped.

Smart
- Remote monitoring, tripping and firmware updates

Safer
- As the first GFCI circuit breakers on the market that met the newest/May 2021 UL requirements[1], Leviton GFCIs set the bar for home safety.
- Leviton AFCI, GFCI and dual-function circuit breakers feature patented reset lockout technology, and will not reset if Ground or Arc Fault protection is compromised

Fastest Installation
- Allows for all wiring at rough-in, without any circuit breakers present[2]
- Only Fully Plug-On Breaker System (up to 60A)
- Circuit Breakers simply snap in for up to 25% faster install

*Smart Hub sold separately

1. The UL943 standard no longer exempts GFCI circuit breakers from detecting and warning when the trip solenoid and/or switching semiconductor fails in the "open" state, rendering the GFCI circuit breaker incapable of tripping in response to a fault condition, resulting in complete loss of GFCI protection. However, the effective date of this requirement is 8/11/24. Leviton GFCIs have always met the more stringent safety requirement.

2. For applications up to 60A when using copper wire; or 50A when using aluminum wire.
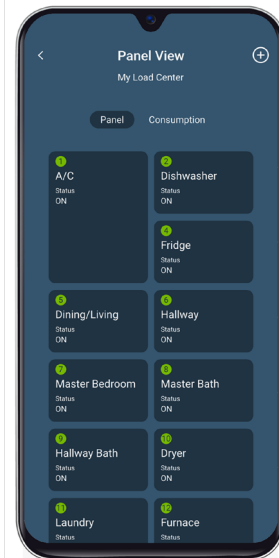

What's a Smart Home without a Smart Circuit Breaker?

Using the intuitive My Leviton app, homeowners can enjoy easy access to essential elements of their load center's data via a smartphone, tablet or desktop.
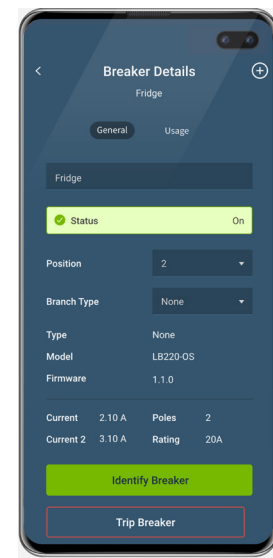

Energy Use

- View real-time energy consumption: total aggregate, individual circuit, or trends by week, month, and year

- The app can calculate your approximate total energy cost

Control

- Remotely turn OFF any circuit breaker[3] and turn smart plugs, dimmers, and switches ON or OFF[4]

- View system status in real time and detect if critical loads need to be addressed

3. Not applicable to Main breaker. All circuit breakers must be manually turned back ON.
4. Decora Smart Wi-Fi lighting control devices sold separately.

Alerts & Updates

- Know when and why a circuit breaker trips

- Be informed if a load is ON or not drawing power for an extended time

- Via remote firmware updates, get the latest protection capabilities and newest features

Single App Control

An industry first, the My Leviton app consolidates control of the Leviton Smart Load Center and the Decora Smart™ Wi-Fi® product lines, enabling users to seamlessly control load center activities and home lighting from anywhere in the world.
