QUICKPORT™ Field-Configurable Patch Block

49255-Q89, 40089-00D, 47689-0QP

APPLICATION

The Leviton QUICKPORT Field-Configurable Patch Block is ideal for wall-mount applications requiring a compact cross-connect block with a small number of field-configurable ports. The QUICKPORT Patch Block holds up to twelve connectors, and is useful where low-cost, add-as-you-go flexibility is desired.

SPECIFICATION

The patch block shall provide 12 ports that can be configured and/or changed individually, and accept QUICKPORT connectors. The patch block material shall be 14-gauge steel with a black powder coat. All plastic parts shall be high-impact fire-retardant plastic rated UL94V-0. The patch block shall include white label positioning blocks and be wall mountable on an industry-standard 89-D bracket. Colors and configurations to be specified per schedule on plan.

FEATURES

• Compact block is ideal for wall-mount applications
• Innovative design supports add-as-you-go flexibility

DESIGN CONSIDERATIONS

• Verify cable pathway in closet
• Recommend that blocks be arranged to allow for future growth
• Port ID can be achieved by using machine-printed, adhesive labels or using different connector colors to color-code the ports
• 89-D mounting bracket (40089-00D) and QUICKPORT snap-in connectors are sold separately
• Four blanks are included (color: black)

STANDARDS & REGULATIONS

• ANSI/TIA-568-D
• cULus Listed

MECHANICAL SPECIFICATIONS

|	
Dimensions:	See page two
Capacity:	12 ports
Materials:	Panels are 14-gauge steel, painted black Plastic connector housings are black fire-retardant plastic rated UL 94V-0, with white label positioning blocks
