

Revolutionizing the Little White Box

Advantages of the Leviton Wireless Structured Media™ Center (SMC)

In addition to supporting the full reach of wireless signals, the SMC provides **easy installation, mounting flexibility, more capacity, and better thermal management.**

Door Versatility

Universal left or right side door orientation. The door opens 180° for better access, and is engineered so it won't shut on its own.

Tri-Plane Heat Dissipation

The Vented Door promotes better intake of cool air and outward flow of warm air, maximizing performance and extending the life of active equipment.

Ratcheting Hinge & Latch System

The system creates fast, tool-free door installations, and the ratcheting feature accommodates for wall imperfections and varying thickness of drywall.

Industry Leading Capacity

Enclosures have more cubic inches than other options on the market when used with the Vented Door.

Retrofit Capability

Plastic doors work with metal Leviton SMCs, improving their wireless signals and allowing for Tri-Plane Heat Dissipation.

Multi-Bay Attachment Tube

The tube creates a multi-bay system between two fully independent SMCs, isolating enclosures for better security and heat containment.
