Support in the Field

Get the support you need with Leviton's nationwide team of field-experienced specification engineers. Instead of being product focused, the team is service and solution oriented. They'll work with you from initial design idea to move-in, ensuring that your equipment will provide optimal performance in each installation. They'll analyze for accuracy, functionality, and compliance with TIA, IEEE, ISO, CSI, and other important industry standards. If you need help explaining the merits of one technology choice over another to your customer, they can help with that too.

All spec team members hold BICSI's Registered Communications Distribution Designer (RCDD®) certification and are members of the Construction Specifications Institute. Simply put, they have the technical expertise, industry knowledge, design-build experience, and information to take your projects to the next level.

Solutions for Every Industry

Different companies have different networking priorities. Leviton's specification experts can help ensure that the infrastructure you install is right for your organization's unique requirements.

- Tech/Telecom
- Health Care
- Hospitality
- Finance & Insurance
- Industrial
- Data Centers
- Government & Military
- Education
- Retail/Consumer
- Manufacturing
- Transportation

Data Center Design

Get expert design and specification support from our data center design team. They provide customized technical support for your next data center project, including design, layout, elevations, and pathways. Contact our data center team at dcteam@Leviton.com.

PROVIDING THE TOOLS AND RESOURCES YOU NEED

Online Resources

Print and Electronic Resources

Take advantage of Leviton's tools for use in bids, design plans, RFPs, and specification documents. Materials, which are available on CD as well as online for download, include:

Drafting & Design Tools

- CAD files
- BIM (building information modeling) objects
- Visio stencils

Sample Bid Spec/RFP Documents

- Cat 5e/6/6A Division 16/27 Compliant
- Optical Fiber Division 16/27 Compliant
- CSI MasterFormat 2004 Division 27

In addition, you can use our literature and technical libraries to find a wealth of product and application information, including:

- Product **spec sheets**
- **Application** profiles
- Independent **test data**
- Instructional **videos**
- Wiring **diagrams**

Training

Attend our educational presentations to keep up to date on new technology, help save money, and keep your project in line with industry standards.

Dive into ez-Learn, a 100% web-based training platform, providing complete access to training on the latest products, installation, troubleshooting, and the most recent NEC code changes. Also, earn BICSI continuing education credits from webinars, both live and on-demand, on the ez-Learn platform.

How to Find Specification Support

Find a specification engineer in your area.

Leviton Network Solutions has long been motivated to create innovations that unlock greater sustainability for partners and customers. Our copper and fiber cable manufacturing facility in Glenrothes, UK, has been carbon neutral since 2011. This was our first step toward accomplishing CN2030, the initiative to achieve carbon neutrality across all Leviton operations by 2030.

As of 2023, Leviton Network Solutions has achieved carbon neutrality across all its facilities, a major milestone that demonstrates our commitment to positive change. We anticipate continuing to push the envelope of what's possible, innovating and embracing sustainability throughout our organization in pursuit of a net zero 2050.

UNIQUE INSTALLATIONS CALL FOR UNIQUE SOLUTIONS

Products and Systems

Copper Cabling Systems

MILLENNIUM™ Copper Cabling Systems offer guaranteed performance and industry-leading support. And since these systems are available around the world, global and multi-national customers can standardize network design and deployments with products that are measured with consistent, specifiable performance parameters per category to meet multinational specifications. These systems have been designed for a range of applications, including:

- Applications requiring Power over Ethernet support up to 100 watts
- High-density cabling and constrained pathway environments
- Intelligent building applications optimizing environmental sustainability
- Wireless applications supporting IEEE 802.11ax/Wi-Fi 6/6E and in-building 5G deployments

Fiber Cabling Systems

The OPT-X™ family of fiber solutions is engineered for simplified deployment and manageability, streamlined network design, and extended distance capabilities. These fiber systems are globally available, offering versatile density options to meet specific network demands while ensuring migration options for future bandwidth growth in networks around the world.

- Support for data center applications requiring extended distances and multiple connection points between active devices
- Network migrations up to 400 Gb/s and beyond
- Pre-terminated fiber solutions and patching for fast deployment
- Fiber systems for enterprise and campus networks
- Field-terminated connectivity for easy splicing and simplified MAC work

Products and Systems

Customized Solutions

Leviton Network Solutions makes building the exact solution for a network quicker and easier than ever. Our custom Make-To-Order trunks, cords, harnesses, and cassettes in a variety of pre-terminated fiber and copper products are made with guaranteed performance and pre-tested factory terminations. Make-To-Order products accelerate onsite installation and network deployment and reduce jobsite waste and cleanup time.

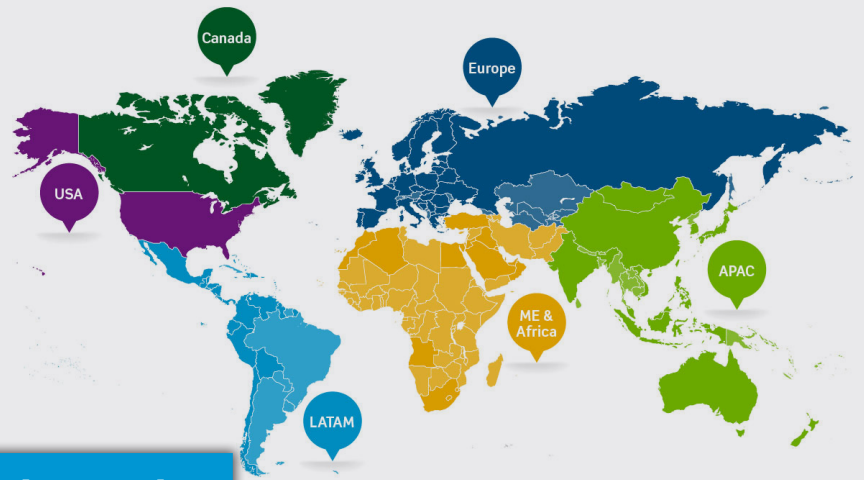

OneReach™ Solutions

Streamline infrastructure management by extending networks with OneReach™. The OneReach solution is ideal for remote applications. By combining fiber cable for long-distance data transmission and copper cable for power over Ethernet (PoE) in a single composite cable, OneReach takes data, PoE, PoE+, and PoE++ to new distances. Also, OneReach is modular, allowing you to easily scale the system to meet your specific application requirements.

**100+
COUNTRIES
AROUND
THE WORLD**

Made in the US, Global Reach

Unlike many US-based companies, the vast majority of Leviton Network Solutions' products are designed and manufactured in the United States. The most recent addition to our US capabilities comes from our acquisition of Berk-Tek™, adding American-made copper and fiber optic cable. Today, Leviton Network Solutions' US factories span coast to coast, with facilities in Pennsylvania, North Carolina, Florida, Illinois, and Washington State. While we're a distinctly American company, our solutions can be found in networks across the globe.

We have the resources to support you wherever you are, with seamless customer service and well-stocked inventory in every region around the world. And with our UK factory support, we have the capacity for redundant operations and quick-turn assemblies in large quantities across the pond, keeping product consistently available.

Today's networks must be fast and reliable, with the flexibility to handle ever-increasing data demands. Leviton can help expand your network possibilities and prepare you for the future. Our end-to-end cabling systems feature robust construction that reduces downtime, and performance that exceeds standards. We offer quick-ship make-to-order solutions from our US and UK factories. We even invent new products for customers when the product they need is not available. All of this adds up to the **highest return on infrastructure investment.**
