

# A Reliable Single Source for Global Network Cabling Systems

Leviton manufactures complete fiber and copper systems — end-to-end cable and connectivity — and offers these solutions globally. We back our systems with full teams of customer specialists, a vast network of certified installer companies, redundant manufacturing operations, strategically located warehouses and distribution partners around the world.

➤ As an established 65-year-old subsidiary, Leviton Canada has extensive experience networking businesses, schools and universities, government agencies, and data centers, including data center infrastructure for the largest wireless carrier in the country.

Canada

➤ Leviton supports Europe from our UK facilities, where we make CPR-rated copper and fiber cabling as well as make-to-order pre-terminated assemblies. Sustainability is a top priority for us, and our Scotland facility is the world's first network infrastructure supplier to achieve carbon neutral status.

Europe

➤ Leviton is a global company, but we are a uniquely American company, as the majority of Leviton network products are designed and manufactured in the United States. This includes popular American-made Berk-Tek cabling. Today we serve U.S. hyperscale and colocation data centers, Fortune 500 companies, financial institutions, and university campuses like Stanford and NC State.

USA

LATAM

➤ Throughout Mexico, the Caribbean, Central and South America, Leviton networks have been installed in financial institutions, energy providers, hotels and resorts, data centers, and commercial offices. We have been delivering proven system solutions to these regions for more than 25 years.

➤ For more than 30 years, Leviton Middle East sales teams and technical experts have helped connect mission critical environments throughout the region, including data centers, health care facilities, resorts, and government agencies like Dubai's state-of-the-art Road Transport Authority headquarters.

ME & Africa

➤ We maintain strong and growing presence throughout the Asia Pacific region, with a proven 20-year history of connecting tech companies, banks, hospitals, and military bases, as well as one of the oldest and largest law firms in the world.
