

Fast, Reliable Charging

Features up to 9.6 kW of output with adjustable amperage from 16 Amp to 40 Amp (requires a 50 Amp breaker)

Ease of Installation

Designed to be compact and easy to install, residential EV charging stations from Leviton come with a mounting bracket and the input cable pre-attached, saving time on installation. Easily mates with Leviton's EV Charging Heavy-Duty Receptacles.

works with **my leviton**

The Brand That Goes Beyond the Charger

Works with the My Leviton App, allowing users to take control of their whole home, from load center to lighting to EV charger.

To complete the electric vehicle infrastructure for a home, add surge protection, smart load centers and smart breakers from Leviton.

SINGLE FAMILY HOMES

Detached or semi-detached homes

MULTI-FAMILY DWELLINGS

Apartments, condos and other MDUs

EV SERIES

Smart Home Plug-In

ELECTRIC VEHICLE CHARGING FROM THE BRAND YOU TRUST

A Station for Every Residential Application

There's a good chance you have installed Leviton devices. Anything from switches to dimmers, GFCIs to load centers... all designed to make life simpler, safer and more productive. Parking should be no different. Install fast and reliable electric vehicle charging stations from the brand you trust.

LEVITON.COM/
EVCHARGING

Charge ANY Electric Vehicle

Leviton's residential charging stations feature the industry standard J1772 coupler, meaning they can charge nearly every electric vehicle in North America, including Tesla.*

For Both Indoor and Outdoor Use

The thermoplastic, water-resistant enclosures are rated NEMA Type 3R, meaning Leviton's charging stations can operate in any weather condition. With the included mounting bracket or optional pedestal, the stations can be installed anywhere, from garages to outdoor parking spaces.
