

EV Series Pro Dual Port

With ChargeLab Charging
Management Software

LEVITON®

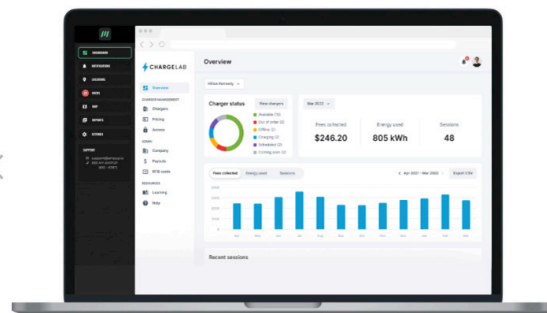

Smart, scalable EV charging for commercial & multi-unit properties

A bundled EV charging solution combining Leviton hardware with powerful, cloud based charging management – designed for commercial, fleet and MDU applications.

Why ChargeLab?

EV Charging Management Software Built for Scale

- Fast & easy deployment – Register and connect chargers in minutes using self serve tools
- Customizable dashboard – Visualize charging data across sites and users
- 24/7 end user support – Phone and live chat support for drivers and site hosts
- Real time monitoring – Automatic alerts for charger faults and network issues
- Site administration – Manage multiple locations, companies, and admins
- Reporting & rebates – Export data for utility and government incentive programs
- Notifications – Set alerts for downtime, faults, or maintenance needs
- Remote firmware updates – Keep chargers up to date without site visits
- Access control – Manage charging for residents, employees, or fleets
- Revenue collection – Accept major credit cards; secure and PCI compliant
- Flexible pricing – Bill by time or kWh; create custom pricing and discounts
- Power management – Load balancing to maximize available electrical capacity
- Vehicle & fleet management – Assign RFIDs, track usage, and optimize fleet charging
