USGBC® and related logo is a trademark owned by the U.S. Green Building Council and is used by permission

The American Recovery And Reinvestment Act of 2009 ("ARRA") provides federal grants and loans for projects throughout the country. Section 1605 of the Act, named the "Buy American" provision, requires that certain materials and manufactured products used in projects funded by the Act be manufactured in the United States. The appearance of the Recovery Act Logo in relation to a Leviton product is only intended to reflect that such product may be used in an ARRA funded project. It does not mean that such product or Leviton is sponsored or endorsed by, or that Leviton receives funds from, the federal government or the Recovery Accountability and Transparency Board. Nothing in Leviton's use of the logo is intended to suggest anything regarding the requirements for funding under ARRA.

## Complete Office Control Solutions with Leviton

Leviton control solutions **modernize energy management**, making workspaces more comfortable and **improving functionality** for employees and visitors. **Enhance the work environment** while dramatically increasing energy efficiency, leading to **increased productivity and an increased bottom line.**

## Smart Office Control Solutions

Combine energy code compliant solutions for automatic shut-off, daylight zone control, level control, dimming and plug load control with scene control, event scheduling, thermostat control and demand response to create an ambient, functional and energy efficient space. From hardwired solutions to wireless flexibility, Leviton can help you design the ideal office space that allows you to enhance your employee experiences, improve the working environment for your staff and meet energy code compliance requirements. From a single standalone office to an entire commercial campus, Leviton gives you the ability to integrate scalable security systems, access controls and entertainment controls.

### Lighting Controls

- Keeps lights on for simple energy savings when office spaces are occupied and off when they are vacant
- Supports all modern lighting aesthetics including LED lighting
- Meets all codes and standards compliance and system compatibility requirements for lighting control

### Daylighting

- Automatically take advantage of natural light to light a space instead of electrical lights
- Control code-compliant sensors, switches, dimming and advanced daylighting from the same location
- Seamlessly integrates into building management systems

### Wireless Control

- Access and control all business properties from one app
- Access remotely via free smartphone app to adjust lighting loads, temperatures and other energy management capabilities
- Integrate lighting, temperature, window covering and control other heavy-duty loads like signage, pumps, fountains and more

### HVAC Control

- Allows precise control over the HVAC system based on occupancy and schedules

### Scene Control

- Offers flexible pushbutton control solutions with easy operation, configuration and installation
- Provides preset scenes for different meeting types, events and other unique lighting needs

### Security Access Control

- Monitors energy usage to improve bottom line operational costs
- Identifies energy-saving opportunities and verifies the effectiveness of conservation initiatives

### Submetering Solutions

- Controls access and time-of-entry via keypad or card control
- Customize access to each user for schedules and privileges
