

Less is More

The EMH+ combines an onboard revenue-grade power meter and a Leviton Data Acquisition HUB into a flexible, all-in-one package.

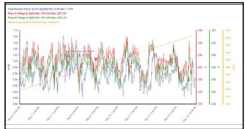

- **Simplicity**—A complete metering system for any building type
- **Easy To Install**—Reduced installation time and cost with an integrated, line-powered meter
- **More Features, Lower Cost**—Costs 30% less than the bundled Series 3300/3500 Meter and Energy Monitoring Hub
- **Scalable**—Employ the VerifEye HD Pulse Module to capture any pulse meter
- **Free Web-Based Software**—Uses Leviton’s free online energy data visualization BMO 2.0 software

Series 3300/3500 Meter

Energy Monitoring Hub

BMO 2.0 Software

EMH+ All-In-One Data Acquisition Server

Expandable, open protocol system makes growth and adjustments hassle-free

Smart LCD touchscreen for intuitive programming

Tracks real-time energy usage for demand response programs

Logs and collects data on user-selected intervals

Cost savings from traditional approach with meter and hub combined
