FEATURES AND BENEFITS

Light Logger
Lighting and Occupancy Monitoring Device

FEATURE	BENEFIT
Works with the Leviton award winning *Dollars & Sensors* program	Provides accurate energy savings calculations and payback analyses to allow users to see how much energy and money occupancy sensors save them
Quick and easy mounting, set-up and data collection	Easy and fast installation
USB connectivity	Easy and fast data download
Excel compatible	Easy data manipulation
3 week data collection capacity on a single set of AAA alkaline batteries	Low maintenance
Increased data logging capacity	Allows almost 4x more log entries than the original Light Logger
Firmware upgradeable	Enjoy up-to-date software without having to buy additional or new product
Non-volatile memory	Retains stored information even without power
Photocell for measuring light in room	Integrated photocell conveniently bundled into product
Passive Infrared (PIR) sensing technology	Dependability
