

Lumina™ RF Decora® Keypad Room Controller

For Use with Lumina RF Wireless Room Control System

Description

The Lumina™ RF Decora® Keypad Room Controller (DLDNK) is the primary user interface for a Lumina RF Wireless Room Control System, combining both familiar pushbutton control and energy management business logic into line voltage-powered wireless communication devices. The Lumina RF Keypad manages a room by coordinating activities of all Lumina RF Wireless Devices within the space.

Lumina RF Wireless Room Control System

The Keypad works with compatible wireless devices to create an advanced intelligent lighting system that can be used to comply with IECC, ASHRAE 90.1, and 2019 Title 24, Part 6 occupancy/vacancy sensing, 0-10V dimming, and daylight harvesting requirements. Dimming, multi-zone daylight harvesting, occupancy and vacancy sensing, manual control, and scene control are configured using the Bluetooth®-enabled Lumina RF Wireless App.

The Keypad also provides the primary interface between the smartphone/tablet commissioning and control device and the Lumina RF Wireless Room Control System. Wirelessly configure, control, monitor and provision the Lumina RF Wireless Room Control system using the Bluetooth®-enabled Lumina RF Wireless App designed for an Android or iOS smart phone and other compatible devices within a 30' range.
