

Load Control, 1 Channel DSI/DALI Broadcast Mode, DMX Input

DESCRIPTION/APPLICATIONS

Leviton Quantran™ load control devices are designed to be used as an integral part of the configurable Quantran Rack system. Dimmers operate using either DMX or mBus control protocols and are available for a variety of load types to suit your project needs

FEATURES AND BENEFITS

- 1 DALI/DSI output channel
- Channel can be configured as DSI or DALI
- DMX or mBus protocol (default configuration is DMX)
- Power restore—upon restoration of power after a power failure, the last level is automatically restored
- Loss of signal—upon loss of control signal, the current level is indefinitely maintained
- Convection cooled
- Manual or software configuration
- Ingress protection: IP00
- Easy interchangeable aluminum chassis construction

FEATURES, CONT'D

- Installable into any Leviton QT Rack
- Manual Configuration
 - DMX start address
- Software configurable settings
 - DMX start address
 - Input protocol selection (DMX or mBus)
 - Output protocol select (DSI or DALI) (DALI=default)
- Indicators
 - Power LED, green:
 - Solid - power present
 - Off - power absent
 - Control signal, yellow:
 - Steady - control signal present
 - Flashing - no data Input
 - Blinking - valid data input
 - Off - control signal absent
