

# Sector Handheld Remote

## Handheld device for basic local manual control of lights within a Sector Intelligent Lighting Control System

- Convenient Control of Personal Lighting
- LED Indicates Communication Status
- Control Lighting up to 25 ft. from Anywhere in the Room

### DESCRIPTION

Leviton's Sector Handheld Remote (SHH00-000) allows convenient control of a Sector system when pointed at a Sector infrared-receiving device from a maximum of 25 feet away. The remote control has five buttons that mimic the functions of the Sector Digital Wall Switch Controller: On, Max, Bright, Dim and Off.

### APPLICATIONS

The Sector Handheld Remote must be used with the Sector Photocell (ODCoP-oSW) device or Sector Digital Wall Switch (SDS00-15W) that acts as the IR receiver. The handheld remote is one of several personal lighting control methods for the Sector system. Lighting can also be manually controlled by using the Sector Digital Switch (SDS00-15W) or the SectorNET Personal Dimming Option (PDO), a point-and-click desktop application that allows you to control your lighting from your computer.

The Sector family of products provides a scalable solution that allows you to install a maximum of 253 Bus Controllers, controlling a maximum of 64 devices each, for complete system flexibility and maximum coverage in any application.
