

Leviton Energy Manager

Annual Report

BASIC OPERATION

Leviton's Energy Manager is a superior web based enterprise energy management system (EEM) that empowers businesses to measure, monitor and manage energy consumption and expenses across all utilities in real time.

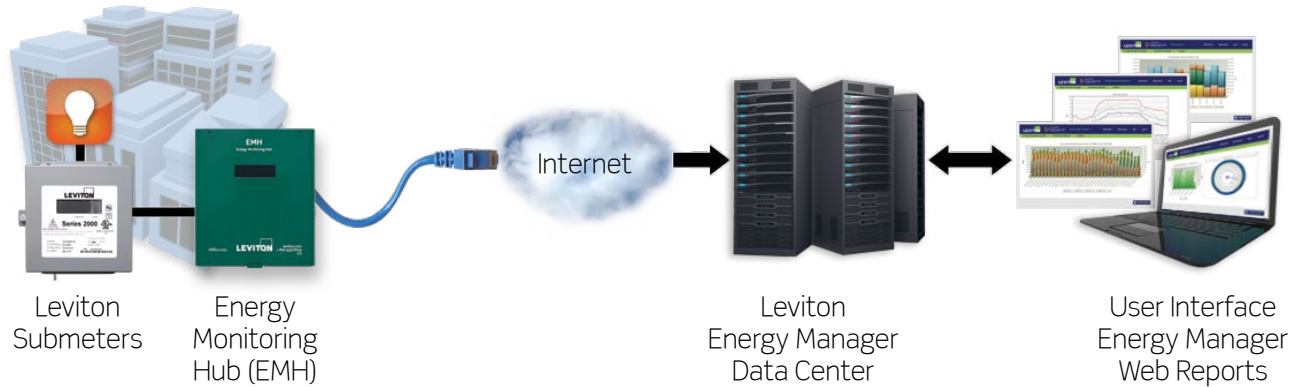

It combines the latest .Net software technology with the most advanced data collection hardware to give you state of the art tracking and reporting capability. Energy Manager also includes the latest in flash technology, data interrogation techniques and enhanced 3D Matrix Back End GUI to produce truly interactive graphs and reports. The combination of these elements provides you with the ability to cross analyze any data you choose, in real time.

Energy Manager analyzes data collected from an unlimited number of metering points. It also collects sensor inputs such as temperature, pH, compressed air and nitrogen. In addition, Energy Manager is designed to collect data from all leading building automation and process control systems. Energy Manager has an extensive set of format and database drivers that provide seamless integration of your enterprise's current and historical information.

FEATURES

- Illustrates information in real time
- Scalable and can accommodate unlimited data points
- On-site system that can be configured for single or multiple sites
- Includes an automatic reporting system and an instant alarm notification system
- Displays all components - cost, kW, kVA, kVAr, Power Factor, MIC
- Collects information from 1 to 60 minute intervals for in-depth tracking
- Produces customized reports to suit precise requirements
- Automatically "pushes" key reports to recipients so they do not have to search for their important dashboard information
- Runs over any network (232-485, Fiber Optic, Wireless, GSM/GPRS/PSTN, Ethernet LAN-WAN) and can inter-connect to multiple third party databases

HOW THE LEVITON ENERGY MANAGER WORKS

- **Meters** record *real time* consumption data
- **Energy Monitoring Hub (EMH)** receives meter data and pushes it to Energy Manager data center
- **Data Center** stores, manages and reports data in *real time*
- **Energy Manager** software analyzes, formats and reports the data
- **User** logs into Energy Manager website and accesses data and reports

ORDERING INFORMATION

CAT. NO.	DESCRIPTION
001-LEMS8-812	Leviton Energy Monitoring Software Package- consists of base license software with 8 control points/ 1 YR. subscription, one (1) user account and one (1) A8812 Energy Monitoring Hub
001-LEMSB-000	Leviton Energy Monitoring Software Base- consists of base license software with 8 control points/ 1 YR. subscription and one (1) user account
001-LEMSP-000	Leviton Energy Monitoring Software Points- is an add points license for additional 8 control points / 1 YR. subscription.
001-LEMSU-000	Leviton Energy Monitoring Software User- consists of one (1) user account/ 1 YR. subscription.
001-LEMSB-R00	Leviton Energy Monitoring Software Base Renewal - a subscription renewal of base license. One (1) User Account. 12 Month License software subscription.
001-LEMSP-R00	Leviton Energy Monitoring Software Points Renewal - a subscription renewal of 8 control points / 1 YR. subscription. 12 Month License software subscription - per each 8 points.
001-LEMSU-R00	Leviton Energy Monitoring Software User Renewal - a subscription renewal of one (1) user account/ 1 YR. subscription.
