

CEC Compliance for Title 20 Approved Products

Product: CEC Compliance for Title 20 Approved Products **Article ID:** 07112014-cds-01

Date: July 11, 2014 (Updated December 1, 2017)

Summary: This article describes when Title 20 certification is required and how to find a list of Title 20 approved products to meet California Title 24 2016 code compliance.

Information: **When do I need to confirm that a product is Title 20 approved and how do I find a list of Title 20 approved products?**

Title 20 certification is required for the sale of certain “**self-contained**” lighting control devices in California.

Title 20 defines a “self-contained” lighting control as a unitary lighting control module where no additional components are required for it to be a fully functional lighting control. This specifically includes:

- Time-switch controls
- Self-contained daylight and photo controls
- Wallbox dimmers
- Wallbox and self-contained occupant sensors

Approved self-contained Title 20 products are listed in the CEC Appliance Efficiency Database at <http://www.energy.ca.gov/appliances/database/>.

Lighting Control Systems are NOT required to be listed in the Title 20 database.

Devices that require another component to operate are considered “systems” and are not required to be Title 20 Certified for sale in California. For example, GreenMAX® Relay systems and low voltage occupancy sensors that require a power pack are not required to be listed in the Title 20 database.

While lighting control system components are not required to be listed in the CEC Appliance Efficiency Database, they are subject to on-site acceptance testing as set forth in the 2016 Building Energy Efficiency Standards (Section 10-103-1 and Section 10-103-2).

For clarification on the Acceptance Testing process, visit the following link to the CEC Acceptance Test Technician Certification program at <http://www.energy.ca.gov/title24/attcp/>.

List of CEC Certified Title 20 Leviton Products Includes the Following
