

Which is best for your Cat 6A U/UTP installation?

Performance Assurance

Guarantees performance significantly above the Cat 6A standard, ensuring the reliability of demanding applications

Robust Design

Designed for demanding installations with a cross filler for enhanced robustness

Maximum Bandwidth

Ideal for high-bandwidth applications, optimized to ensure high-speed connections

Sustainability

Smaller and lighter cable, with lower embodied carbon, less transport emissions and jobsite waste

Ease and Speed

For cost constrained, value-engineered projects, the flexibility of RDT saves time at installation

Space Constraints

The smallest Cat 6A on the market, making it ideal for applications where space is at a premium

Both SST and RDT are included in our MILLENNIUM™ copper systems. Learn more about which system is right for you: [Leviton.com/Millennium](https://www.leviton.com/Millennium)
