STRUCTURED MEDIA™ Enclosures for Multi-Dwelling Units (MDU)

APPLICATION

Leviton's STRUCTURED MEDIA™ Enclosures for Multi-Dwelling Unit (MDU) applications are metal structured wiring enclosures designed to address the specific needs of residential, commercial, and mixed-use developments. Knockouts on the enclosures allow for up to 2" conduit connections. A unique pass-through design enables installation to function as a junction box to feed low-voltage cables to floors directly above and below. This allows wiring to every outlet in each room of the dwelling.

47605-M28

FEATURES & BENEFITS

- Commercial-sized knockouts on endcaps
- Enclosures are white powder-coated 20-gauge steel construction
- Houses virtually all technology including networking, DSL, Internet modem, VoIP, telephone, intercom, video and audio
- Flush mount covers and hinged doors available

Mexico

WARRANTY INFORMATION

For Leviton product warranties, go to Leviton.com/ns/warranty

SPECIFICATION

STRUCTURED MEDIA Enclosures shall create a distribution point for voice, data, video, audio, security, and control applications in a multi-dwelling unit. The enclosures shall include multiple knockouts on the top and bottom to support conduit up to 2 in diameter and facilitate cable routing and entry. The enclosures shall be constructed from white powder-coated, 20-gauge steel, and shall meet all applicable standards: c(UL)us Listed.
