

Five-Ring Horizontal Cable Managers and Covers

APPLICATION

Leviton Five-Ring Horizontal Cable Managers are ideal for patch-cord distribution at the front of industry-standard 19-inch equipment racks, cabinets, and hinged wall-mounted brackets. Covers are available (sold separately) to provide a clean, finished appearance.

SPECIFICATION

The five-ring cable manager shall provide the capability to organize and contain patch cords on the front of the manager. The front of the manager shall provide five horizontal distribution rings to reduce stress on stored cables and to retain optimal cable geometry. All distribution rings shall have edges with a radius to protect cables from nicks and tears. Managers shall be available in 1RU and 2RU heights with either 2 in., 4 in. or 6 in. deep rings. Metal covers shall be available, sold separately. Material shall be 16-gauge steel with a black powder-coat finish.

FEATURES & BENEFITS

- Distribution rings are radius-edged to protect cable from nicks or wear
- Oversized distribution rings accommodate large quantities of patch cords
- Five-ring design reduces cord stress and improves containment near patch panels
- 4 in. and 6 in. deep managers are available in 1RU and 2RU options, 2 in. deep managers available in 2RU only
- 1RU and 2RU metal covers are available (sold separately)

DESIGN CONSIDERATIONS

- Ensure adequate space for ring clearance in cabinets. Position cabinet rails to accommodate 6 in. or 4 in. rings to allow for cabinet door closure
- Install managers above and below patch panels
- Four #12-24 screws supplied with each manager

STANDARDS & REGULATIONS

- c(UL)us
- RoHS
- EIA 310.E
