

Recessed Horizontal Cable Manager

APPLICATION

Low-profile, recessed three-ring manager for patch cord distribution. For installation in standard 19" equipment racks and cabinet enclosures.

SPECIFICATION

The three-ring cable manager shall provide the capability to organize and contain patch cords in a cabinet. The front of the panel shall provide three (3) high capacity horizontal distribution rings (plus openings in each mounting bracket) to reduce stress on stored cables and to retain optimal cable geometry. All distribution rings shall have edges with a radius to protect cables from nicks and tears. The cable manager shall be 1 EIA rack unit high, and shall fit a standard 19" rack. The material shall be .060" (16 gage) steel with a black powder-coat finish.

FEATURES & BENEFITS

- Distribution rings are radius-edged (smooth polished) to protect cable from nicks or wear
- Oversized distribution rings to accommodate patch cords
- Three-ring design reduces cord stress and improves containment near patch panels
- Use as an alternate mode of horizontal management between patch panels
- Position near recessed patch panels for cable management

STANDARDS & REGULATIONS

- c(UL)us Listed
- RoHS
- EIA 310.D

MECHANICAL SPECIFICATIONS

Dimensions:	See page two
Materials:	16-gauge steel, black powder coated
Temp. (Storage):	-40 °C to +65 °C (-40 °F to +149 °F)
Temp. (Installation):	Refer to cable installation temperature
Temp. (Operating):	-10 °C to +60 °C (+14 °F to +140 °F)
Humidity (Max.):	95% relative humidity, non-condensing

COUNTRY OF ORIGIN

Taiwan
