DURAPORT™ Industrial Stainless-Steel Wallplates

APPLICATION

DURAPORT industrial connectivity products provide IP67-class protection to safeguard your connectivity from humidity/moisture, corrosive materials, temperature extremes, and other conditions often found in the industrial environment.

SPECIFICATION

Single-gang and dual-gang stainless-steel wallplates shall be field configurable and accept DURAPORT Industrial Connector Housings. The single-gang wallplate shall provide 1 or 2 ports, and the dual-gang shall provide 2 or 4 ports. Wallplate shall be constructed of stainless steel, have an integral over-molded gasket, fit standard NEMA electrical boxes, be c(UL)us Listed, and compliant with ANSI/TIA-1005.

FEATURES & BENEFITS

- IP67-rated environmental sealing (dust/water protection)
- Over-molded wallplate gasket ensures watertight fit
- Wallplate mounting holes have embedded sealing feature which provides the dual benefit of sealing, and helping to ensure proper orientation during installation of wallplate
- Provide a durable, easy-to-clean solution for demanding environments
- Available in single-gang configurations of 1 or 2 ports and dual-gang configurations of 2 or 4 ports

DESIGN CONSIDERATIONS

- Uses standard Leviton QUICKPORT™ opening to easily replace, or upgrade performance without replacing entire outlet
- Compatible with standard NEMA boxes
- DURAPORT Industrial Patch Cords and QUICKPORT connectors sold separately

STANDARDS & REGULATIONS

- IEC IP67
- c(UL)us Listed
- ANSI/TIA-1005
- ANSI/TIA-568
- UL 1863
- CAN/CSA-C22.2 No. 182.4-1990

MECHANICAL SPECIFICATIONS

Dimensions:	See page 2
Ingress Protection:	IP67 (dust/water)
Capacity:	
Single-Gang:	1 or 2 ports
Dual-Gang:	2 or 4 ports
Materials:	
Wallplate Type:	302 Stainless Steel
Mounting Screws:	Type 18-8 Stainless Steel
Wallplate Gasket:	Thermoplastic Elastomer

COUNTRY OF ORIGIN

China
