

## MOS Passthrough Module

### APPLICATION

The Leviton Multimedia Outlet System (MOS) Passthrough Module offers an aesthetically pleasing means to transition a pre-terminated cable from the back to front of a MOS wallplate. The 1.5 unit front-loading module can also accept MOS speakON® or XLR connectors for microphones and audio amplification (sold separately).

### SPECIFICATION

Passthrough modules shall comply with ANSI/TIA-568-C requirements. They shall be manufactured from fire-retardant plastic. Modules shall be interchangeable between various multimedia wallplates.

### FEATURES

- Modules are front-loading for ease of installation
- SpeakON or XLR connectors (sold separately) can be installed into the module for inclusion into the MOS system
- Available in five colors

### DESIGN CONSIDERATIONS

- Two passthrough modules may be installed per wallplate gang
- Pair the 1.5U module with a 0.5U module to leave room for an additional 1U module in the wallplate gang

### STANDARDS COMPLIANCE

ANSI/TIA-568-C

### PHYSICAL SPECIFICATIONS

Dimensions: See below

Materials: UL 940V-0 ABS

Mounting: Module snaps into MOS wallplate

### COUNTRY OF ORIGIN

Taiwan
