

e2XHD High-Density Universal Flat Panel & Accessories

APPLICATION

The e2XHD Patching System provides a high-density solution for enterprise and data center applications where fast deployment and simple maintenance are priorities. Cassettes quickly snap-in and pull out of 1RU panels, making installation, moves, adds, and changes easier than ever. A rear cable manager is available to support incoming fiber and copper cables, and blank cassettes snap into the rear of panels to block any unused openings. Copper cassettes are available either on pre-terminated trunks or with field-terminated connectors. Fiber cassettes are pre-terminated.

e2XHD Flat Panel - 1RU

Rear Cable Manager

Blank Cassette

SPECIFICATION

Panels shall be constructed of 20-gauge steel with a black powder-coated finish. Port identification shall be included. Panels shall accept shielded, UTP, and fiber e2XHD cassettes, and hold up to 48 duplex fiber channels or 48 copper ports in a 1RU space. Copper and fiber cassettes shall snap into the rear of the panel and shall require no tools to remove. Panel shall meet all ANSI/TIA-568-0.D requirements and all applicable standards.

FEATURES

- Panels allow mix-and-match of shielded, UTP, and fiber e2XHD cassettes
- Alignment tabs ensure upright insertion of cassettes
- To remove cassettes from panel, simply pull out handle using release latch
- Rear Cable Manager supports incoming copper or fiber cables and includes cable management rings
- Blank cassette available for unused cassette openings

DESIGN CONSIDERATIONS

- Rear cable manager sold separately from panel
- Panels mount on standard 19-inch relay rack or cabinet
- Intended installation location for manager is on the rear side of a standard rack rail. Rear cable manager is not compatible with most cabinet mounting configurations.
- Cable clamp mounting kits are available to provide strain relief for incoming fiber trunk cables
- When routing copper cable, one Rear Cable Manager is recommended for every 2RU of panel to allow for better rear access
- Panels include #12-24 fasteners and appropriate parts to bond panel to rack/cabinet

STANDARDS & REGULATIONS

- Patch panel compliant with ANSI/TIA-568.0-D

MECHANICAL SPECIFICATIONS

Dimensions:	See page two
Materials:	20-gauge steel, powder-coated black
Capacity:	1RU: 48 duplex fiber channels or 48 copper ports
	1RU: Accepts up to 8 copper and/or fiber cassettes (12-fiber LC-MTP®, 24-fiber MTP-MTP), or 4 24-fiber LC-MTP cassettes

COUNTRY OF ORIGIN

USA: E2XHD-BLK
Mexico: E2X1A-CMB, E2XHD-COV
Taiwan: E2X1F-S48
