

SOLUTION BRIEF

IT/AV SYSTEMS FOR HUDDLE SPACES

Huddle spaces are an integral part of any business environment, and they depend on a state-of-the-art combination of IT and audiovisual systems to support seamless operations. Leviton solutions provide easy connection, switching, and extension of HDMI® and VGA signals to displays or projectors anywhere in the room, all networked over easy-to-install category-rated cable. These solutions help facilitate the smooth transition of audiovisual presentations during meetings and conference calls.

- Simple, plug-and-play solutions
- Autoswitching wallplate for two HDMI and one VGA source supports seamless content and screen switches
- VGA input is scaled to 1080p output for automatic image sizing at display
- Simple installation: only requires a single Cat 6A patch cord
- HDBaseT certification for assurance that comes from third-party verification and certification of AV signal transmission performance
- Uses Power-over-HDBaseT (PoH) to power the autoswitching wallplate from the receiver at the display – no power is required at the tabletop – freeing floor or table outlets for device power and charging
