

TOP 10 REASONS LEVITON IS A
WORLD-CLASS
**FIBER
OPTIC**
MANUFACTURER

- 1.** Globally available OPT-X™ end-to-end fiber systems offer versatility to meet specific network demands while ensuring migration options for future bandwidth growth
- 2.** The first 24-fiber multimode and single-mode MPO systems for migration up to 400 Gb/s and beyond
- 3.** Over \$1 million in cable inventory on hand in multiple facilities to ensure quick delivery
- 4.** Four make-to-order (MTO) facilities around the world, serving the Americas, EMEA, and Asia, supplying plenum, riser, and CPR-rated LSZH fiber cabling
- 5.** Dedicated pre-terminated assembly production cells assure high quality and quick order turnaround of over two million fiber links annually
- 6.** Product is supplied with test results and labeled with unique serial numbers detailing date of manufacture for complete traceability
- 7.** High precision laser cleaving technology for all single and multi-fiber connectors, and 100% testing of insertion loss and return loss for all single-mode assemblies
- 8.** Fiber infrastructure specifically designed for hyperscale and cloud data centers, and addressing the needs of AI computing clusters
- 9.** Comprehensive enterprise fiber system solutions available for simplified maintenance, easier field termination, and splicing
- 10.** Leviton Network Solutions is carbon neutral and has reduced its carbon emissions by 55% since 2021
