

Vizia Fluorescent Dimmer for Hi-lume® or Eco-10™ (Eco-Series) Ballasts

DEFINITION

The Leviton Vizia VZH08-1L and VZH06-7L Fluorescent Dimmers are specifically designed for use with Hi-lume® or Eco-10™ (Eco-series) ballasts. When an energy-saving type lamp is used, the VZH08/VZH06 dimmers may not turn the lamp ON. This condition is **not** due to a dimmer malfunction. The energy-saving type lamp does not meet the minimum wattage requirement of the ballast.

DESCRIPTION

- Fluorescent lamps such as the GE Watt-Miser®, Osram/Sylvania SuperSaver® or Philips Econ-o-watt® are promoted as energy-saving alternatives to commonly manufactured fluorescent lamps of a particular wattage.
- The required minimum lamp wattage is indicated on the ballast. If a lamp of a lesser wattage is used, the ballast will not properly control the lamp.

NOTE: The VZH08/VZH06 dimmer is designed to operate all Hi-lume® and Eco-10™ ballasts. The ballasts, **not** the VZH08/VZH06 dimmer, have minimum load requirements.

SOLUTION

- Ensure that the fluorescent lamp is of a type controllable by the ballast. The ballast indicates the lamp type and wattage it is capable of controlling.
- By using the correct minimum lamp load as indicated on the ballast, the ballast will operate properly and the Vizia VZH08/VZH06 will provide ON/OFF switching and full-range dimming control.

Watt-Miser® is a registered trademark of General Electric.
SuperSaver® is a registered trademark of OSRAM SYLVANIA, Inc.
Econ-o-watt® is a registered trademark of Philips Lighting Company
Hi-lume® and Eco-10™ are trademarks of Lutron Electronics, Inc.
