

Industry-Leading HF Ground-Fault Protection

High-Frequency Interoperability. GFCI Protection You Can Trust.

Modern appliances use advanced components that can cause many standard GFCIs to trip unnecessarily. Leviton's SmartlockPro® GFCI outlets feature the latest microcontroller technology to ensure compatibility and reduce nuisance tripping. Our advanced design accurately detects real ground faults, even in high-frequency environments, and has been tested with leading appliance brands to guarantee reliable performance, meeting Leviton's long standing quality standards. Our existing SmartlockPro® devices listed below are designed to meet the latest UL Standards for HF interoperability, ensuring consistent performance across a wide range of modern electrical systems and appliances.

In addition to being High-Frequency ready, our GFCI line features:

- Auto self-test ground-fault protection
- Reset Lockout Technology prevents unsafe resets
- LED Status indicator light for quick feedback
- Slimmest in-box depth for easy installs (most models)
