

BC4 Automation Controller

bitwise™

FEATURES AND BENEFITS

It is easy for installers to integrate the BC4 controller with no coding needed, and it is simple for users to manage their systems via the BitWise control app on iOS and Android devices.

One App For Everything

The fully-customizable BitWise control app is available for iOS and Android smartphones and tablets. Using templates and modules dealers can customize the look, feel and included features to fit the needs of an organization or individual users.

INTEGRATE WITH OMNI CONTROLLERS

Now, you can integrate with Omni control systems! Create a comprehensive security and AV automation system with custom user interfaces via BitWise.

SPECIFICATIONS

The BC4 controller doesn't just run the components of your automation system.

- Supports two-way interaction with serial and networked devices
- Communicates with every BitWise user interface and controller on the network
- Interacts with mechanical devices, thanks to on-board relays and signal-sensing ports.
- Provides built-in macro storage.
- Native integration with Omni security & automation systems
- Supports third-party intercom door station functionality
