

# Getting Started Guide

---

LEVITON LOAD CENTER  
with My Leviton

Cat. No. LDATA

WEB VERSION

## Welcome

Thank you for your purchase of the Leviton Load Center.

With over 100 years of experience in safety and technology, Leviton is changing power itself with the Leviton Load Center.

## Requirements

To install and operate the Leviton Load Center you will need the following:

1. An Internet Connection

2. An iOS (11.0 or later) or Android (6.0 or later) mobile device

3. A My Leviton cloud account (setup through the My Leviton app)

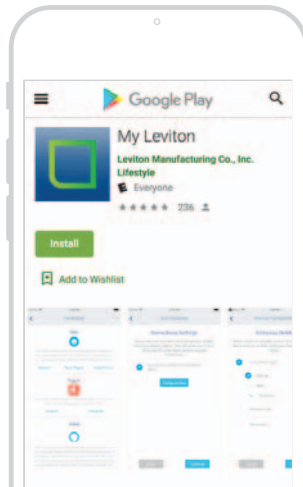

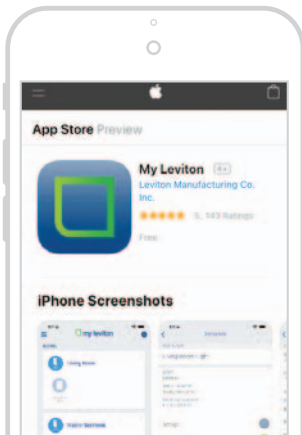

4. An installed Leviton Load Center with Smart Breakers and Data Hub

## Download the App

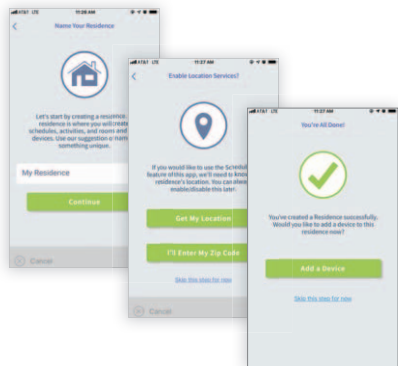

Visit <http://my.leviton.com> on your mobile device and click your preferred link.

## Launch the App and Create an Account

- Launch the My Leviton App.
- If you have an account already, log in. If not, choose “Sign Up for an Account.”
- Your My Leviton account allows you to communicate with your device via the internet. It also allows you to configure your device and receive notifications.

- After logging in, you will be guided through the process of creating a “Residence.”  
NOTE: You must have at least one residence associated with your account.
- Once you have created a residence, add your “My Leviton” devices.

# Add Your Leviton Load Center

- Tap the 'plus' icon in the top right and then choose 'Add Device'
- Select 'Leviton Load Center' from the Device Type screen
- Follow the app instructions to add your Leviton Load Center.

## Set Up Your Breakers

**Found 9 Breakers**

The next step is to name and assign each breaker's position. If you were expecting a number other than 9, tap the rescan button below.

[Continue Setting Up Breakers](#)

[Rescan For Breakers](#)

If you are unable to find all of your breakers, performing a factory reset may be required.

[Tap here to learn more about resetting the breakers.](#)

[Advanced Configuration](#)

[Cancel](#) [Continue](#)

**Breaker 1 of 12** [IDENTIFY](#)

First, tell us which of your breakers is blinking now. Assign it a position by selecting a position number. If you need to see the breaker blink again, tap the identify button. Can't find the blinking breaker or is it on another panel? [Click Here.](#)

What does this breaker control?

Select the Position

Give the Breaker a Name

[Next](#)

**My Awesome Load Center**

<input type="checkbox"/> AC 1	<input type="checkbox"/> Attic 1
<input type="checkbox"/> Bedroom	<input type="checkbox"/> Bath 1 Light
<input type="checkbox"/> Empty Slot	<input type="checkbox"/> Kitchen
<input type="checkbox"/> Upstairs 1	<input type="checkbox"/> Shed
<input type="checkbox"/> Upstairs 2	<input type="checkbox"/> Upstairs 2

[Finish](#)

- Once the breakers have been found, name them and assign each a position. Tap the 'Identify' button to locate individual breakers.
- Breaker names and positions can be changed/updated later.

**If you don't have an internet connection, you are done with the Leviton Load Center configuration. The Leviton Load Center can be connected to the Data Hub at a later time, however, usage and fault information will not be available until this is done.**

## Connect Leviton Load Center to Network

- Choose whether you would like to connect to the Internet via Wi-Fi or Ethernet.
- Follow the instructions within the My Leviton App to complete the setup process.

## Troubleshooting

The My Leviton app contains a support section including installation articles and answers to Frequently Asked Questions.
