

Modernizing Multi-Location Switching Without Travelers, Wi-Fi, or Wall Damage

Electrification and smart control technologies continue to evolve, and homeowners increasingly expect flexible lighting, outlet, and fan control without major renovation work. At the same time, contractors are under pressure to deliver clean installations quickly, cost-effectively, and without disrupting finished spaces. Traditional multi-location switching requires travelers or additional wiring, which is often impractical in existing homes.

Leviton Anywhere Companions address this challenge with a wireless, battery-powered control solution that pairs directly with any Decora Smart® device. Contractors can now add 3-way, 4-way, or multi-location control to any circuit without cutting drywall, fishing cable, or relying on home Wi-Fi.

› Multi-Location Lighting Control Without Additional Wiring

Traditional 3-way wiring requires a traveler between two or more switch locations. In retrofit environments, especially in finished or insulated walls, adding travelers is disruptive, expensive, and time-consuming.

› Anywhere Companions Eliminate That Need Entirely

Once paired, the Companion communicates directly with the Decora Smart primary device, enabling switching, dimming, fan speed control, or table lamp dimming all without any new conductors in the wall.

› Wireless Control and the Pro Environment

Anywhere Companions operate on direct device-to-device RF pairing, meaning no Wi-Fi, no cloud dependency, and instant responsiveness.

› Interoperability Defined

Decora Smart products form the backbone of Leviton's smart platform. Anywhere Companions pair seamlessly with smart dimmers, switches, fan controllers, mini dimmers, plug-in dimmers, and smart plugs for scheduling, app control, and voice control, if desired.

› Leviton's Anywhere Companion Technology

Anywhere Companions offer reliable RF communication with long battery life and quick pairing. They mount over any surface using standard Decora wallplates.

› Real-World Applications Enabled

- Add a 3-way anywhere
- Fan speed control without rewiring
- Lamp dimming using a DAWDC paired with a D23LP
- Remodel installations

> Why Contractors Should Stock Anywhere Companions

- Instant solutions for customer requests
- Higher profitability with minimal labor
- No mess or drywall patching
- Uniform and familiar Decora aesthetics

> Conclusion

Leviton Anywhere Companions modernize multi-location lighting and fan control by removing the need for travelers, rewiring, or wall modification. With universal compatibility across the Decora Smart platform, contractors gain a fast, reliable, and professional-grade solution.

If you can mount a wallplate, you can add a switch location. No wiring. No mess. No Wi-Fi required.
